

QUICKVUE  
In-Line  
**QUICKVUE**<sup>™</sup>  
QUICKVUE+<sup>®</sup>

- Quality leads to Accuracy
- Rapidity leads to Reactivity
- Simplicity leads to Cost-effectiveness

### Delivering relevant solutions to empower clinical decisions

With over 30 years of experience in the field of immunoassays, bioMérieux is committed to putting the patients' needs first by providing quality, high medical value diagnostic products.

We know that rapidity of diagnosis and accuracy of treatment impact clinical outcome. This is why bioMérieux proposes the QUICKVUE<sup>™</sup> range of rapid tests to ensure you have fast, cost-effective clinical diagnostic solutions for point-of-care testing.

# QUICKVUE<sup>™</sup> RAPID TESTS

**We have the answer**

from diagnosis,  
the seeds of better health

⇒ Having **confidence** in your diagnosis is essential if you are to rapidly ensure **appropriate patient treatment, efficient isolation triage and relevant surveillance measures.**

⇒ QUICKVUE<sup>™</sup> is a range of **high quality, rapid tests** designed to provide ever so **simple, point-of-care solutions** when rapidity and accuracy are crucial to clinical outcome.

⇒ QUICKVUE<sup>™</sup> TESTS have the **proven\* quality and reactivity** you need in infectious diseases and reproductive health.

\* Clinical and economical proof available on request.

## INFLUENZA

- **Influenza A+B TEST**
- **Influenza TEST**

Dipstick for the detection of influenza type A and type B from nasal swab, nasopharyngeal swab (NPS) or nasal wash/aspirate specimens.

- Results in 10 minutes, or less.
- 1 step (nasal wash/aspirate); 3 steps (nasal swab, NPS).
- Less than 30-seconds hands-on time.
- 1 reagent.
- QuickVue Influenza A+B differentiates type A or type B.
- High specificity for influenza.
- Not affected by variations of seasonal influenza strains.

Ref. 97021 - 25 tests A+B  
Ref. 97020 - 25 tests

## RSV

- **RSV TEST**

Dipstick for the qualitative detection of Respiratory Syncytial Virus.

- Results in 15 minutes.
- 99% sensitivity with nasopharyngeal aspirate.
- 92% sensitivity with nasopharyngeal swab.
- 83% sensitivity with nasal/nasopharyngeal wash.
- 3 steps nasopharyngeal swab, 1 step nasopharyngeal aspirate and nasal/nasopharyngeal wash with approximately 30 seconds hands-on time.
- 1 reagent.

Ref. 97024 - 20 tests

## STREPTO A

- **Strep A TEST QUICKVUE+<sup>®</sup>**

Cassette with plus/minus (+ / -) readout for the rapid qualitative detection of Group A Streptococcal antigen from throat swab specimens.

- Results in approximately 5 minutes.
- 98% overall agreement with SBA culture.
- Two-reagent procedure to reduce hands-on time.
- Test Complete indicator lets you read the test at your convenience.

Ref. 97007 - 25 tests

- **Strep A TEST QUICKVUE<sup>®</sup>  
In-Line**

Unique In-Line extraction for the rapid qualitative detection of Group A Streptococcal antigen from throat swab specimens.

- One easy step via In-Line extraction.
- Results in 5 minutes, or less.
- 96% overall agreement with SBA culture.
- Single reagent method allows for less chance of operator error.
- Individually packaged for convenient single-use testing and disposal.

Ref. 97004 - 25 tests

- **Dipstick Strep A TEST**

Dipstick for the rapid qualitative detection of Group A Streptococcal antigen from throat swab specimens.

- Results in 5 minutes, or less.
- 95% overall agreement with culture.
- High sensitivity at low levels of colony count.

Ref. 97010 - 25 tests

Ref. 97011 - 50 tests

## hCG

- **One-Step hCG Combo TEST QUICKVUE+<sup>®</sup>**

Cassette with plus/minus (+ / -) readout for the qualitative detection of human chorionic gonadotropin (hCG) in serum or urine for the early detection of pregnancy.

- Results in 5 minutes (serum), 3 minutes (urine).
- > 99% accuracy.
- 10 mIU/mL sensitivity in serum.
- 20 mIU/mL sensitivity in urine.
- Detects low hCG levels as early as 2-3 days before expected menses.

Ref. 97012 - 30 tests

Ref. 97013 - 90 tests

- **One-Step hCG Combo TEST**

Cassette for the qualitative detection of human chorionic gonadotropin (hCG) in serum or urine for the early detection of pregnancy.

- Results in 5 minutes (serum), 3 minutes (urine).
- > 99% accuracy.
- 25 mIU/mL sensitivity in serum and urine.
- Detects low hCG levels as early as 2-3 days before expected menses.

Ref. 97017 - 50 tests

- **One-Step hCG Urine TEST**

Cassette for the qualitative detection of human chorionic gonadotropin (hCG) in urine for the early detection of pregnancy.

- Results in 3 minutes, or less.
- > 99% accuracy.
- 25 mIU/mL sensitivity.
- Detects low hCG levels as early as 2-3 days before expected menses.

Ref. 97016 - 25 tests

## H. PYLORI

- **H. pylori gII TEST**

Cassette for the rapid qualitative detection of IgG antibodies specific to *Helicobacter pylori*.

- Results in 5 minutes, or less.
- 92% overall agreement with EIA.
- Simple, one-step procedure from only 2 hanging drops of whole blood, or 1 drop of serum or plasma.

Ref. 97018 - 10 tests

## CHLAMYDIA

- **Chlamydia TEST**

Cassette for the direct qualitative detection of *Chlamydia trachomatis* antigen from endocervical swab or cytology brush specimens.

- Results in 12 minutes, or less.
- 92% sensitivity; 99% specificity (overall).
- Highly accurate in asymptomatic patient population:
  - 94% sensitivity,
  - 99% specificity.
- Simple extraction procedure with just 2 reagents.
- After extraction, just add the sample to the test cassette.

Ref. 97001 - 25 tests
